55 mm	Water	55mm closure with foam liner & sticker; 55mm lid; 55mm closure	340–668.5 g (3)
37 mm	—	37mm press-on closure	—

**How to read it:** the neck finish is fixed before the bottle is blown and must match both your filling line and your closure. "Preform-only" means the neck is supplied as a preform; closures are sourced separately or custom-tooled. Weight range shows the lightest–heaviest catalogue preform on that neck (count in brackets).
