APPLICATIONS & SUITABILITY

Engineered for still and mineral water lines — light, high-clarity preforms that hold cap-thread integrity through hot summers and long-haul export.

Lead time: Typically 4–8 weeks from confirmed PO to first delivery for standard SKUs; final lead time is confirmed at quotation. Custom colours or lightweighting trials may extend it.

INDICATIVE SPEC SHEET Final tolerances per signed PFI. Not an engineering-approved drawing. Generated from canonical product data.
